Many new concerns arise as our children return to school. Since many households have both parents working, younger and older children will come home from school alone. Just knowing that your child has arrived home safely and on time can give you peace of mind. There are simple things that can help you with this situation that you already have in your home.

Another helpful tool is a camera system. San Antonio Security offers various Camera System Installation Packages. This service allows you to see live video of your home via your internet service.

The service can also provide you with video clips that are sent and viewed on certain cell phones.

Your security system can be the answer to child accountability. Your alarm system can be re-programmed to include additional services where by a child is given their own code for arming and disarming.

This code will send a distinct signal to the local monitoring station. When that signal is received, the monitoring station will email/text your notification.

This same feature can also be used for cleaning services or anyone that you would like to know when they enter and leave your home or office.

Both of these options can help keep your children safe and accountable. It is important to train your child how to correctly use the security system so they will be comfortable with arming and disarming. Our trained technicians would be happy to answer any questions you might have on the operation of your system.

All of these features and systems vary in function, size and cost based on your specific needs. Please contact Gary Palmer at (210) 342-3100 X-1008 to set an appointment to evaluate and customize your services.
